USA
ROYAL INSTITUTE
FOR CHARTERED ENGINEERS

Computer hardware engineers are responsible for the design, development and testing of electronic hardware as it relates to computer systems.

Computer hardware engineers may work on microstructures such as circuitry, or may integrate constructed modules to plan and build larger devices. They occasionally write instructional documentation to be delivered with the hardware product.

WHO SHOULD ATTEND?

Computer Enthusiasts
IT Professionals
Those who have keen interest in software programming and hardware troubleshooting

COURSE PARTS:

Computer Programming
Operating System
Computer Network
Discrete Structure & Graph Theory
Database Management Systems
Computer Graphics
Data Structure & Files
Microprocessor
Object Oriented Software Engineering
Software Architechture
System Security

PARKING

COURSE STATIONARY
